Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a programmable input/output circuit, classified in class 326, subclass 38.
 - II. Claims 9-11, drawn to an antifuse matrix cell, classified in class 326, subclass 82.
 - III. Claims 12-15, drawn to a programmable input/output driver, classified in class 326, subclass 83.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Groups II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the programmable input/output circuit does not required the particular of the antifuse matrix or the programmable input/output driver of Group III. The subcombination has separate utility such as controlling other generic input/output circuit.

3. Inventions Group II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention the programmable input/output circuit of Group III has separate utility such as output driver in other circuit without having the particular of the antifuse matrix of Group II. See MPEP § 806.05(d).

4. A telephone call was made to Kristin Castle on 6/25/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Don P Le whose telephone number is 703-308-4890. The examiner can normally be reached on 7AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Tokar can be reached on 703-305-3493. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7724 for regular communications and 703-308-7724 for After Final communications.
